EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Adams on December 20, 2004.

The application has been amended as follows:

In the claims:

In claim 2, line 23, after – by a user --, change “to display” to – and displaying --.

DETAILED ACTION

Priority

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on December 26, 2000. It is noted, however, that applicant has not filed a certified copy of the 2000-395257 application as required by 35 U.S.C. 119(b).

3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on February 2, 2001. It is noted, however, that applicant has not filed a certified copy of the 2001-026370 application as required by 35 U.S.C. 119(b).

Allowable Subject Matter

4. Claims 2-4 are allowed.

5. As to claim 2, Barber (U.S. Patent 5,579,462) discloses a derived data display adjustment system, comprising:

a display screen for displaying the plurality of characteristic curves and a plurality of derived numerical data values calculated from the characteristic curves (fig. 18; col. 12, lines 25-33);

means for displaying a derived numerical data calculation user interface on the display screen to enable user selection of a derived numerical data calculation process for calculating a derived numerical data value from one of the characteristic curves when the characteristic curve is selected by the user (fig. 2 and fig. 15; col. 12, lines 54-67; "peak mode" enables calculation of characteristics related to a peak);

Barber does not disclose means for displaying a derived numerical data adjustment user interface on the display screen to enable user adjustment of a display position of a derived numerical data value when the derived numerical data value is selected by the user. Alexander (U.S. Patent 6,262,728), however, discloses a system to display annotations and move them if the location is inconvenient (col. 16, lines 48-65).

Neither Barber nor Alexander discloses means for determining whether the derived numerical data calculation process is possible when one of the characteristic curves or one of the derived numerical data values is selected by a user, and displaying one of the derived data calculation user interface and the derived data adjustment user interface based on the determination result. Barber discloses a spectrometer with *characteristic curves* that are selectable, but does not disclose that the *derived numerical data* values are selectable. Determining whether a calculation process is possible is not disclosed by Barber, and in fact would be completely unnecessary to Barber's invention, since Barber can only select characteristic curves, and can only launch a derived numerical data calculation process. Alexander discloses a derived data adjustment user interface, but also fails to disclose determining means to decide whether a calculation process is possible. Since neither of these references discloses the determining means as recited in claim 2, the combination of the references does not render claim 2 obvious.

6. The following is an examiner's statement of reasons for allowance:

.As to claim 2, the prior art does not anticipate the limitation of "means for determining whether the derived numerical data calculation process is possible when one of the characteristic curves or one of the derived numerical data values is selected by a user, and displaying one of the derived data calculation user interface and the derived data adjustment user interface based on the determination result" with the other limitations of claim 2.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
